

## Chromatography systems, Working condition, Refurbished & First-class refurbished

Labrecycling has applied 3 classes to its chromatography instruments. When you choose an HPLC in working condition, you are buying a working chromatography system, which has been cleaned and tested. Only no parts have been replaced or refurbished.

With a refurbished system, both the inside and outside have been cleaned. The system is tested and the test results are shared with you. Defective parts are replaced.

A First-class Refurbished system is cleaned inside and out. Defective parts are replaced with new parts. Frequently used parts, which are subject to wear and tear, are replaced preventively. Finally, you will receive an \* AI/PM report.

- Exterior cleaned
- Inside cleaned
- Tested and the system is working

- Exterior cleaned
- Inside cleaned
- Tested and test results mailed
- Defective parts are replaced

- Exterior cleaned
- Inside cleaned
- Defective parts are replaced by new parts
- Frequently used parts, which are subject to wear and tear, are replaced preventively.
- Tested and comes with **AI/PM reporting** \*

\* Agilent HPLC, GC and GC/MS only
