

FIRST-CLASS REFURBISHED WITH AN AI/PM REPORT

Our **First-class refurbished Agilent GCs, HPLCs and GC/MS systems** come with an **AI/PM report (Analytical Instrument Preventative Maintenance report)**, which gives you the assurance that you have purchased a refurbished system that is like **NEW** again.

Labrecycling Analytical Instrument Preventative Maintenance

With **Analytical Instrument Preventative Maintenance**, Labrecycling preventively renews spare parts that are subject to normal wear mechanisms. In this way, the impact on your sample load will be minimised. In other words, future failures are remedied, before their official schedule, through our AI/PM test.

An AI/PM test involves quality performance tests with traceable values. In the AI/PM report, you can find out what, when and which component was renewed.

Labrecycling can guarantee through AI/PM reporting that you are buying a First-class refurbished system.

First-class refurbished Agilent HPLC, Agilent GC or Agilent GC/MS

- Exterior cleaned
- Inside cleaned
- Defective parts are replaced by new parts
- Frequently used parts, which are subject to wear and tear, are replaced preventively.
- Tested and comes with AI/PM reporting
